Hi Chris - EPA is making a presentation at the next PPG meeting....which is this week; but I will not be in attendance. The August 17th Tech Stakeholder Meeting will be my last meeting with SSFL Stakeholders. With respect to TASC, I forwarded your email to David Cooper. Craig

p.s. Regarding your emails about the DOE EIS. Thanks for your clarification that you dont think that EPA should do an EIS. Whew! :)

 Subject: TASC

Dear Craig,

After reading some comments from Abe, I can't think of a better time to bring in EPA TASC than related to the Background Study and the statistical method that Abe is now questioning.

This is the exact time that we need an independent consultant - one that will not necessarily agree with DOE or EPA - one truly independent.

That is why we need TASC. I plan to submit a new formal request.

The EPA had told me a while back that they may be able to bring in TASC in conjunction with DTSC and the PPG. We could have used that.

Are you going to be at the next PPG meeting? Are you doing a presentation?

Thanks!

Chris
